

Hazardous Substance Cabinets

HAZ001/05/06/10/11/13/15

Shuttleworth Hazardous Substance Cabinets are purpose-built for the safe storage of hazardous materials in full compliance with health and safety regulations. Designed for use in hospitals, laboratories, and industrial environments, these cabinets help ensure controlled access to potentially dangerous substances.

Each cabinet is constructed from high-quality, durable materials and finished in a high-visibility yellow epoxy powder coat. Reinforced doors and BS3621-compliant locks with two keys included as standard enhance security.

Cabinets are clearly labelled with GHS-compliant hazard symbols and come fitted with a fully integrated leak-proof sump to contain spills.

Adjustable shelving is provided to accommodate varying storage needs, with options for one, two, or three internal shelves depending on the model. Wall-mountable versions are also available where space optimisation or fixed installation is required.

Additional sizes beyond this listed range are available on request.

Code	Width	Depth	Height
HAZ001	45.7cm	30.5cm	45.7cm
HAZ005	45.7cm	45.7cm	76cm
HAZ006	45.7cm	45.7cm	91cm
HAZ010	91.5cm	45.7cm	100cm
HAZ011	61cm	45.7cm	152.5cm
HAZ013	91.5cm	45.7cm	152.5cm
HAZ015	122.2cm	45.7cm	183cm

Configuration

- HAZ001: One Shelf Hazardous Substance Cabinet, 5Ltr Capacity
- HAZ005: One Shelf Hazardous Substance Cabinet, 10Ltr Capacity
- HAZ006: One Shelf Hazardous Substance Cabinet, 18Ltr Capacity
- HAZ010: One Shelf Hazardous Substance Cabinet, 30Ltr Capacity
- HAZ011: Three Shelf Hazardous Substance Cabinet, 20Ltr Capacity
- HAZ013: Two Shelf Hazardous Substance Cabinet, 36Ltr Capacity
- HAZ015: Three Shelf Hazardous Substance Cabinet, 45Ltr Capacity
