

Drug Storage Cabinets

DSC001/04/05/09

Shuttleworth Drug Storage Cabinets provide a durable and secure solution for the organised storage of medications across healthcare settings, including hospitals, clinics, pharmacies, and care facilities.

Constructed from high-quality mild steel, the cabinets are fully welded and finished in a white epoxy powder coating to support easy cleaning and infection control.

All models are supplied with BS3621-compliant locks and two keys as standard, with optional Euro Lock configurations available, including single, double, or four-lock variations to meet differing security requirements.

Internal storage configurations are available separately, offering flexible compartmentalisation to suit specific clinical needs.

Additional sizes beyond this listed range are available on request. These cabinets are purpose-built to improve security, organisation, and accessibility of drug storage in demanding clinical environments.

Code	Width	Depth	Height
DSC001	50cm	30cm	60cm
DSC004	60cm	30cm	90cm
DSC005	80cm	30cm	60cm
DSC009	100cm	46cm	180cm
