

# Key Cabinets

## KEC001/02/05

Shuttleworth Key Cabinets provide a secure and efficient solution for key management in healthcare, commercial, and industrial settings.

Designed to help maintain control and organisation, these cabinets are ideal for use in hospitals, clinics, care homes, offices, and facilities where multiple keys must be securely stored but easily accessible to authorised personnel.

Manufactured from mild steel and powder coated in white epoxy for easy cleaning and long-term durability, each cabinet is fitted with an external three-digit combination lock to prevent unauthorised access.

The internal layout features clearly labelled hooks, supporting quick identification and streamlined key retrieval. These cabinets are wall mountable, making them space-efficient and suitable for placement in secure but accessible locations.

This range offers a practical and secure storage solution to support operational efficiency and access control in high-responsibility environments.

Code	Width	Depth	Height
KEC001	44.7cm	5.5cm	28.7cm
KEC002	44.7cm	5.5	28.7cm
