

# Storage Lockers

## STL001/02/03/04/05/06/07

Shuttleworth Storage Lockers provide a secure and robust solution for storing personal items, uniforms, or equipment in healthcare, commercial, and industrial environments. Manufactured from high-quality materials and designed for durability, these lockers are suitable for hospitals, clinics, offices, and staff areas where safety, organisation, and accessibility are essential.

Each locker is fitted with a CAM lock as standard, offering secure access for individual users. An integrated airflow venting system supports hygiene and circulation, particularly useful in healthcare or high-traffic settings.

Lockers are available with one to eight doors per unit, allowing facilities to choose the most appropriate configuration for their storage needs.

A wide selection of colour finishes is available, including blue, green, black, yellow, dark grey, light grey, and red, ensuring alignment with interior branding or department coding.

| Code           | Width | Depth | Height |
|----------------|-------|-------|--------|
| STL00*- COLOUR | 30cm  | 45cm  | 180cm  |
