

Medical Record Trolleys

MRT002/07/08/09

The Shuttleworth Medical Records Transfer Trolley with Lock has been specifically designed to meet the needs of modern healthcare environments where the secure storage, easy transportation, and quick access to patient records are essential. Manufactured from strong mild steel with a durable epoxy powder-coated finish, the trolley offers long-lasting performance and is easy to clean in line with strict infection control protocols.

The lockable top section, available with either a Cam lock or a digital lock option, provides a high level of security for sensitive records, ensuring compliance with data protection and confidentiality requirements within clinical practice.

Its compact dimensions and smooth-rolling swivel castors, with rear braking system, make it easy to manoeuvre through wards, offices, and corridors while maintaining stability during transfers. Ergonomically positioned push handles enhance control and reduce operator strain, supporting safe daily use by staff.
