

General Purpose Trolleys

GPT001/02/03/04

The Shuttleworth General Purpose Trolley (GPT series) delivers versatile functionality essential to fast-paced clinical environments. Built to withstand daily use, its robust mild steel frame is finished in durable epoxy powder coating, ensuring both longevity and effortless cleaning.

With options for two or three shelf configurations, each unit features 40mm raised edges to secure contents in transit and smooth-rolling 100mm swivel castors, enabling seamless movement through tight corridors and across wards.

Engineered for efficiency, the cart includes cushioned protective buffers and push handles at both ends, allowing staff to manoeuvre the unit from either side with minimal effort. Offered in both mild and stainless steel variants, it supports stringent decontamination procedures while meeting infection control standards.

Its combination of cleanliness, stability, and adaptability ensures seamless integration into healthcare workflows, enabling procurement teams to invest in a piece of equipment that supports operational excellence, safety, and long-term value.

Code	Width	Depth	Height
