

Linen Trolleys

LNT Trolleys

Shuttleworth offers a robust and adaptable selection of linen trolleys tailored to the demanding workflows of clinical, care, and hospital settings. Constructed from powder-coated mild steel, these trolleys deliver exceptional durability and hygiene, effortlessly meeting the rigorous cleaning standards expected in medical environments. Each variant throughout the LNT range is thoughtfully engineered to balance secure storage with ease of use: open ring systems provide quick access to linen bags, while pedal-operated designs with secure lids ensure enclosed transport options for discretion and infection control.

It's easy-to-manoeuve wheels and ergonomic design make transporting linen effortless improving workflow and ensuring the efficient distribution and collection of hospital linens.

Available in multiple formats including clean and soiled variants, single or double ring frames, pedal-operated lids, and enclosed cabinet configurations, Shuttleworth linen trolleys can be customised to meet diverse departmental needs while maintaining a consistent quality standard across the range. For clean linen distribution, cabinet-style trolleys are available with adjustable shelving and options including lockable doors or PVC curtains to suit different storage and access needs.
