

Ward Drug Trolley

WDT004

The Shuttleworth Ward Drug Trolley WDT004 has been developed to streamline pharmaceutical preparation and dispensing in ward environments by combining secure storage, ergonomic access, and hygienic engineering.

Its thoughtful design features a hinged writing top that provides a convenient workspace for care professionals to prepare medication or complete records, all within arm's reach of the patient.

Constructed using high-quality materials with a durable, easy-clean finish, the trolley is built to maintain rigorous infection control standards.

Heavy-duty 100mm swivel castors, two equipped with brakes ensure stable and smooth manoeuvrability across ward floors while allowing the trolley to be firmly secured when stationary.

The WDT004 supports efficient and confident medication management in healthcare environments.
